Sewer Amount Paid _____   Total Amount Paid _____

In making application for water service, I agree that I will be responsible for the monthly bill upon installation. I will also be responsible for the protection of the water meter and meter box when installed and during the period of construction and thereafter to keep the water meter available at all times to the City of Cookeville Water Department for proper testing and reading of the water meter or if it becomes damaged in any way.

I agree to pay for labor and materials for damages or any corrections to be made to the water meter/box to maintain proper testing and reading that may occur to the water meter or I will relinquish the right of service from the City of Cookeville Water Department.

If this is a **sprinkler meter** I also understand that by City Ordinance 18-104, it is illegal "to make improper connections thereto so as to evade, or attempt to evade, the payment of lawful service and connection charges", by connecting this meter to a domestic water line. I also understand that this meter can be pulled by the City at anytime if the installation of my system does not meet City or State plumbing codes, or if the installation of my system has not been inspected and approved by the City of Cookeville.

If a pressure reducer is required, it must be installed between the water meter and the residence. It is therefore the customer's responsibility to have the reducer installed, regulated and maintained.
